

INDUSTRIAL STORMWATER MONTHLY INSPECTION REPORT

Inspections must be conducted by a person with the knowledge and skills to assess conditions and activities that could impact stormwater quality at the facility, and evaluate the effectiveness of best management practices required by this permit. Retain a copy of the completed and signed form in accordance with Permit Condition S9.C.

FACILITY NAME: Alaskan Copper Works		INSPECTION TIME: 3:30 pm		DATE: 2/21/20		
WEATHER INFORMATION:						
<ul style="list-style-type: none"> Description of Weather Conditions (e.g., sunny, cloudy, raining, snowing, etc.): <u>Mostly sunny; upper 50 degrees; light wind</u> 						
<ul style="list-style-type: none"> Was stormwater (e.g., runoff from rain or snowmelt) flowing at outfalls and/or discharge areas shown on the Site Map during the inspection: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Comments: 						
I. POTENTIAL POLLUTANT SOURCE AREA INSPECTION AND BEST MANAGEMENT PRACTICES EVALUATION						
SWPPP and Site Map: Have a copy of the SWPPP and site map with you during the inspection so that you can ensure they are current and accurate. Use it as an aide in recording the location of any issues you identify during the inspection.			Yes	No	Findings and Remedial Action Documentation: Describe any findings below and the schedule for remedial action completion including the date initiated and date completed or expected to be completed.	
<ul style="list-style-type: none"> Is the Site Map current and accurate? 			X			
<ul style="list-style-type: none"> Is the SWPPP inventory of activities, materials and products current? 			X			
Any new potential pollutant sources must be added to the map and reflected in the <i>SWPPP Facility Assessment & Tables 2, 2A, 3 and 5</i> .						
Vehicle/Equipment Areas: Equipment cleaning: Check NA if not performed on-site. Skip section. Is equipment washed and/or cleaned only in designated areas? <ul style="list-style-type: none"> Observe washing: Is all wash water captured and properly disposed of? Equipment fueling: Check NA if not performed on-site. Skip section. <ul style="list-style-type: none"> Are all fueling areas free of contaminant buildup and evidence of chronic leaks/spills? Are all chemical liquids, fluids, and petroleum products, on an impervious surface that is surrounded with a containment berm or dike that is capable of containing 10% of the total enclosed tank volume or 110% of the volume contained in the largest tank, whichever is greater? Are structures in place to prevent precipitation from accumulating in containment areas? <ul style="list-style-type: none"> If not, is there any water or other fluids accumulated within the containment area? Note: If containment areas are not covered to prevent water from accumulating, the SWPPP must include a plan describing how accumulated water will be managed and disposed of. 			Yes	No	NA	Findings and Remedial Action Documentation: <div style="margin-top: 20px;">X - No washing observed at the facility.</div> <div style="margin-top: 20px;">- Propane fueling area in good condition (sanitary basin)</div> <div style="margin-top: 20px;">- Drums stored in connex box with secondary containment.</div> <div style="margin-top: 20px;">- All containment areas are covered. No signs of accumulating water</div>
			X			
			X			
			X			

Equipment maintenance:	Yes	No	NA	Findings and Remedial Action Documentation:
• Are maintenance tools, equipment and materials stored under shelter, elevated and covered?	X			- Equipment stored West of 3405 was under cover in open sided connex boxes.
• Are all drums and containers of fluids stored with proper cover and containment?	X			
• Are exteriors of containers kept outside free of deposits?	X			
• Are any vehicles and/or equipment leaking fluids? Identify leaking equipment.		X		
• Is there evidence of leaks or spills since last inspection? Identify and address.		X		
• Are materials, equipment, and activities located so that leaks are contained in existing containment and diversion systems (confine the storage of leaky or leak-prone vehicles and equipment awaiting maintenance to protected areas)?	X			
Add any additional site-specific BMPs:				

I. POTENTIAL POLLUTANT SOURCE AREA INSPECTION AND BEST MANAGEMENT PRACTICES EVALUATION				
Good Housekeeping BMPs:	Yes	No	NA	Findings and Remedial Action Documentation:
1. Are paved surfaces free of accumulated dust/sediment and debris?	X	X		
• Date of last quarterly vacuum/sweep <u>2/8/20</u>				
• Are there areas of erosion or sediment/dust sources that discharge to storm drains?		X		- Catch basins and inserts are in fair to good condition, with most fines/particulates accumulating near/around catch basins and within inserts; some inserts need replacement, especially near south entrance of 3300. Cleanup of area and replacement inserts to be addressed by end of second quarter. - Multiple receptacles throughout facility. All closed (except wood bin). Open metal storage bins under awning in CSO basin. - Pothole in front of 3300 in parking area, and three potholes near 2958 with fines exposed, are to be addressed by end of second quarter. - Tires underneath hollow, metal staircase to 3200 on westside near ramp to be removed by 2/28/2020 - Most areas are in good condition and pavement is swept regularly.
2. Are all waste receptacles located outdoors:				
• In good condition?	X			
• Not leaking contaminants?	X			
• Closed when is not being accessed?	X			
• External surfaces and area free of excessive contaminant buildup?	X			
3. Are the following areas free of accumulated dust/sediment, debris, contaminants, and/or spills/leaks of fluids?				
• External dock areas	X			
• Pallet, bin, and drum storage areas	X			
• Maintenance shop(s)	X			
• Equipment staging areas (loaders, tractors, trailers, forklifts, etc)	X			
• Around bag-house(s)		X		
• Around bone yards	X			
• Other areas of industrial activity:	X			

Spill Response and Equipment: Are spill kits available, in the following locations? <ul style="list-style-type: none"> Fueling stations Transfer and mobile fueling units Vehicle and equipment maintenance areas Do the spill kits contain all the permit required items? <ul style="list-style-type: none"> Oil absorbents capable of absorbing 15 gallons of fuel. A storm drain plug or cover kit. A non-water containment boom, a minimum of 10 feet in length with a 12 gallon absorbent capacity. A non-metallic shovel. Two five-gallon buckets with lids. Are contaminated absorbent materials properly disposed of?	Yes X X X X X X X X	No 	NA 	Findings and Remedial Action Documentation: - 3405 spill kit needs a 10-foot boom and five-gallon buckets. - 3200 spill kits in good condition.
I. POTENTIAL POLLUTANT SOURCE AREA INSPECTION AND BEST MANAGEMENT PRACTICES EVALUATION				
General Material Storage Areas: <ul style="list-style-type: none"> Are damaged materials stored inside a building or another type of storm resistance shelter? Are all uncontained material piles stored in a manner that does not allow discharge of impacted stormwater? Are scrap metal bins covered? Are outdoor containers covered? 	Yes X X X	No X 	NA X 	Findings and Remedial Action Documentation: - Most scrap metal bins are stored in CSO or discharge to ground basins or under cover, except scrap metal bin near 3317 (tenant's bin) needs stormproof cover; to be addressed by end of second quarter.
Stormwater BMPs and Treatment Structures: Visually inspect all stormwater BMPs and treatment structures devices, discharge areas infiltration and outfalls shown on the Site Map. <ul style="list-style-type: none"> Are BMPs and treatment structures in good repair and operational? Are BMPs and treatment structures free from debris buildup that may impair function? The permit requires Permittees to clean catch basins when the depth of debris reaches 60% of the sump depth. In addition, the Permittee must keep the debris surface at least 6 inches below the outlet pipe. Based on this, do catch basins need to be cleaned? Are berms, curbing or other methods used to divert and direct discharges adequate and in good condition? 	Yes X X X	No X 	NA 	Findings and Remedial Action Documentation: - 3405 treatment system is in good condition. - 3200 treatment system in good condition. - Lift stations and catch basins are in good condition.
Observation of Stormwater Discharges: <ul style="list-style-type: none"> Is the discharge free of floating materials, visible oil sheen, discoloration, turbidity, odor, foam or any other signs of contamination? Water from washing vehicles or equipment, steam cleaning and/or pressure washing is considered process wastewater and is not allowed to comingle with stormwater or enter storm drains. Is process water comingling with stormwater or entering storm drains? Illicit discharges include domestic wastewater, noncontact cooling water, or process wastewater (including leachate). Were any illicit discharges observed during the inspection? 	Yes X	No X 	NA X 	Findings and Remedial Action Documentation: - No samples taken during inspection.

II. CORRECTIVE ACTION AND SWPPP MODIFICATIONS DESCRIPTIONS: Additional space to describe inspection findings and corrective actions if needed. Provide brief explanation of the general location and the rationale for the additional or different BMPs.

Scrap metals bin near south side of 3317 needs stormproof cover. Work with Tenant to replace bin.
Pothole in front parking area of 3300 building and 3 more near 2958 with exposed fines need to be filled/repaved.
Tires underneath staircase at 3200 need to be removed by 2/28/2020.
3405 spill kit needs a 10-foot boom 2/28/2020.

III. CERTIFICATION STATEMENTS AND SIGNATURES:

Inspector - Certification: This section must be completed by the person who conducted the site inspection prior to submitting this form to the person with signature authority (see Permit Condition G2) or a duly authorized representative of that person.

- ☒ The facility is in compliance with the terms and conditions of the SWPPP and the Industrial Stormwater General Permit.
- ☐ The facility is out of compliance with the terms and conditions of the SWPPP and the Industrial Stormwater General Permit. This report includes the remedial actions that must be taken to meet the requirements of the SWPPP and permit, including a schedule of implementation of the remedial actions.

"I certify that this report is true, accurate, and complete, to the best of my knowledge and belief."
